12th International Congress on Pulmonary Diseases, Intensive Care and Tuberculosis

Tehran, Iran

Dear Organizing Committee:

Please accept my sincere appreciation for inviting me to participate in your upcoming 12th International Congress on Pulmonary Diseases, Intensive Care and Tuberculosis. It is indeed an honor.

Since your last Congress, I have continued to follow with great interest your many institutional achievements and individual accomplishments of your faculty. These contributions to medical science in Iran - and the international community - deserve great respect.

Over the past two years, we all have witnessed a profound disruption in the global order, which has impeded our collective ability to collaborate for the common good in the areas of infectious disease prevention, treatment, and research. From my perspective, as a practitioner of health diplomacy with Iran for over 20 years, I believe the world must now include a *new infectious disease designation* – **the virus of distrust and devaluing of the importance of humanitarian ideals around the world.**

It is precisely because of these global headwinds that platforms like the 12th International Congress are no longer merely academic milestones; they are vital humanitarian lifelines. When formal channels of communication falter, medical diplomacy and scientific exchange become the enduring *bridges over barriers* that connect us. The shared commitment to fighting pulmonary diseases by advancing primary and critical care represents a universal language—one that transcends borders and reaffirms our collective humanity.

Shahid Beheshti University of Medical Sciences and the National Research Institute of Tuberculosis and Lung Diseases have consistently demonstrated that profound scientific progress can be achieved - even under the most demanding circumstances. This resilience is a testament to the dedication of your faculty, many of whom I am privileged to call not only esteemed colleagues but close personal friends.

Therefore, I offer my highest endorsement for this year's Congress. I am confident that the deliberations, research presentations, and clinical insights shared in Tehran this October will not only advance the frontiers of respiratory medicine and intensive care but will also serve as a powerful catalyst for renewed international solidarity.

I look forward to contributing to these critical discussions and to celebrating the enduring strength of our professional and personal bonds.

With my highest regards and warmest wishes for a successful Congress,
